

● **Brix & Kamp A/S**
Rådgivende ingeniørvirksomhed FRI

Brix & Kamp er et af Danmarks ældste rådgivende ingeniørvirksomheder. Firmaet blev etableret omkring 1940 af de to civilingeniører Brix Pedersen og Kamp Jørgensen og har siden udviklet sig til en vidt-forgrenet virksomhed med afdelinger i Hjørring, Aalborg, Frederikshavn og Thisted. Vi dækker derved geografisk hele den nye nordjyske region.

Igennem årene har Brix & Kamp oparbejdet en række kompetencer, der gør firmaet til en efterspurgt samarbejdspartner for en bred vifte af kunder. Hos det offentlige er det bl.a. sygehuse, plejecentre, uddannelsesinstitutioner, idrætsanlæg og forsvaret. På boligsiden er det almene boliger herunder ældreboliger og ungdomsboliger, andelsboliger og byfornyelse. For private bygherrer er det industri, erhverv, forretninger, antenneanlæg, kommunikationsanlæg og edb-installationer. Ved flere af vore kunder er vi tilknyttede som "husrådgivere".

Vi beskæftiger i dag ca. 60 medarbejdere. Flere af vore ingeniører har bred ekspertise og mange års erfaring med rådgivning inden for byggesektoren. Dette gælder både planlægning, projektering og styring af udførelsen ved både små og store byggeopgaver.

Brix & Kamp er landets førende specialist i projektering og rådgivning inden for antenneanlæg. Desuden tilbyder virksomhedens afdeling Engineering at løse en række opgaver på det maritime område. Vi har løst adskillige opgaver for forsvaret igennem årene, og i 2002 modtog firmaet Forsvarets Bygningstjenestes Ingeniørpris.

Brix & Kamp er siden 1988 ejet og ledet af Bent Vanggaard, Ole Thomsen, Leif Høltzermann, og Per Jørn Nielsen samt Henrik Jensen, som blev tilknyttet i 2005.

● **Brix & Kamp A/S**
Rådgivende ingeniørvirksomhed FRI

Brix & Kamp is one of Denmark's oldest firms of consulting engineers. The firm was established in about 1940 by the two civil engineers Brix Pedersen and Kamp Jørgensen and has since developed into an extensive enterprise with offices in Hjørring, Aalborg, Frederikshavn and Thisted. Geographically, the firm thus covers all of the new Region North Jutland.

Over the years, Brix & Kamp has built up a range of competences, making the firm a popular collaboration partner for a wide variety of clients. Public sector clients include hospitals, nursing homes, educational institutions, sports complexes and the armed forces. Housing projects include council housing, housing for senior citizens and young people, cooperative housing as well as urban renewal projects. Projects undertaken for private developers include industrial and commercial buildings, shops, aerial installations, communication systems and IT installations. We are engaged as in-house consultants by several of our clients.

The firm currently has approx. 60 employees. Several of our engineers possess extensive expertise and have many years of experience as consultants within the construction sector, advising on planning, projecting and the management of construction projects large and small.

Brix & Kamp is the leading Danish specialist in projecting and offering advice on aerial installations. Moreover, the firm's Engineering department offers a wide range of services for the maritime industry. We have completed several contracts for the Danish armed forces over the years, and in 2002, the firm was awarded its engineering prize Forsvarets Bygningstjenestes Ingeniørpris.

Since 1988 Brix & Kamp has been owned and managed by Bent Vanggaard, Ole Thomsen, Leif Høltzermann and Per Jørn Nielsen as well as Henrik Jensen, who joined the firm in 2005.
