

Et omfattende måleudstyr er til rådighed for de knap ti medarbejdere, der ikke alene installerer nye ventilationsanlæg, men også yder service på eksisterende anlæg overalt i Nordjylland.

● Vestergaard Ventilation ApS

Vestergaard Ventilation possesses long-standing and unique experience about all types of ventilation methods. The company cooperates with building contractors as well as directly with customers.

No task is too difficult for Vestergaard Ventilation. The company is responsible for indoor climate control in offices and schools, for the well-being of the adults and children who use the buildings. Vestergaard Ventilation constructs air-extraction systems for physics classrooms or chemicals cabinets, etc. We deliver optimal solutions to industry to provide anything from excess pressure in a dust-free environment, air extraction and air injection in painting units to the air-conditioning and refrigeration of machinery. Furthermore, the company manufactures stainless metal extraction hoods for canteens.

● Vestergaard Ventilation ApS

Vestergaard Ventilation har gennem en årrække samlet en enestående erfaring i alle former for ventilation. Virksomheden samarbejder med entreprenører og direkte med ordregiverne.

Ingen opgave er fremmed for Vestergaard Ventilation. Firmaet sikrer klimaet på kontorer og skoler, hvor mange voksne eller børn opholder sig. Vestergaard Ventilation konstruerer udluftning fra f.eks. fysiklokaler eller kemiskabe. Til industrien leveres de

optimale løsninger, hvad enten behovet er overtryk i støvfri lokaler, udsugning og indblæsning i malekabiner eller aircondition og køling af maskiner. Desuden har virksomheden egen fabrikation af rustfrie emfang til storkøkkener.

Vestergaard Ventilation har et grundigt kendskab til de krav, der stilles af brandmyndighederne og andre, ligesom det har stor viden om dimensionering, så anlæggene bliver så støjsvage som muligt.

Vestergaard Ventilation possesses detailed knowledge of the requirements made by the fire authorities and others, together with extensive know-how about dimensioning so that the plants are as quiet to operate as possible.

Comprehensive measuring equipment is available to our ten employees who, in addition to installing new ventilation systems, also service existing plant throughout northern Jutland.
