## ● GMN – Entreprenør og Brolægger

Kvaliteten er i højsædet hos entreprenør og brolægger GMN, uanset om opgaven skal løses for en virksomhed, en privat kunde eller boligforening.

GMN løser stort set alle små og mellemstore opgaver, der kræver brug af mini-maskiner, for eksempel snefyndning, graveopgaver, brolægning, rensning af stalde, opbrydning af betongulve, anlæg af haver og renoveringsopgaver. Firmaet har også inspektions-tv til brug ved rørskader, ligesom man udfører kloakspuling.

Ud over entreprenøropgaverne har GMN også salg og transport af belægningssten, vejsalt, sand, sten, flis, bark og muld samt BIO-BLOKKE til faskiner. Firmaet tilbyder desuden graffitirens og sælger 100-1.200 liters containere til husholdningsaffald.

GMN er vokset fra at være et enkeltmandsfirma i 1983 til i dag at have fire ansatte og afdelinger i Skanderborg, Århus og Horsens.

## ● GMN – Entreprenør og Brolægger

Quality is given pride of place when the contractors and paving company GMN undertakes assignments for corporate or private customers, or housing associations.

GMN carries out almost all small and medium-sized jobs that require mini machines, such as snow clearance, digging, paving, clearing of agricultural outbuildings, taking up concrete flooring, landscape gardening and renovation projects. The company has TV inspection equipment for locating pipe damage, and also washes out sewers.

In addition to contracting work, GMN also sells and transports paving materials, road salt, sand, stone, wood chip, bark and topsoil as well as BIO-BLOKs for drainage purposes. The company also undertakes graffiti cleaning, and sells 100-1,200-litre containers for household waste.

GMN has grown from being a one-man business in 1983 to now having four employees and departments in Skanderborg, Aarhus and Horsens.
