

# HOLST KLOAKSERVICE A/S

## ● Holst Kloakservice A/S

Holst Kloakservice A/S er et familiedrevet firma, der udover slamsugere også har TV-inspektion og industrirenovation.

Firmaet blev grundlagt i 1960 af Orla Holst, der dengang startede med dagrenovation i Skanderborg Kommune.

I 1967 blev den første slamsuger købt, og firmaet har siden været i konstant udvikling og ekspansion og råder i dag over en vognpark på 11 avancerede og kombinerede biler, der alle er udstyret med den sidste nye teknik inden for branchen, og som inkl. anhænger kan transportere op til 30 kbm.

Den sidste udvidelse i firmaet er to topmoderne TV-inspektionsbiler med specielt uddannet mandskab. Firmaet købte i 1992 Risskov Kloakservice, hvor der er seks tilsvarende biler, og hvor den ene af sønnerne er daglig leder.

Miljøkravene bliver naturligvis overholdt i begge firmaer, idet samtlige biler er monteret med det påkrævede materiel, ligesom mandskabet har et A.D.R. bevis – en godkendelse for, at de må køre med olie og kemikalier.

Firmaet betjener kunder i hele Danmark – og kører for såvel kommuner og virksomheder som for private.

## ● Holst Kloakservice A/S

Holst Kloakservice A/S is a family-owned company which, in addition to sewer cleaning, carries out TV inspections of drains and sewers and industrial refuse collection.

The company was founded in 1960 by Orla Holst who initially engaged in refuse collection in the Municipality of Skanderborg.

Orla Holst acquired his first sewer cleaner in 1967. Since then, the company has undergone constant growth and expansion and now boasts a fleet of eleven state-of-the-art and combined vehicles which are all equipped with the latest technology for this line of business and which, with trailers, can transport loads of up to 30 cubic metres.

The most recent addition is two state-of-the-art TV inspection vehicles with specially trained operators. In 1992, the company took over Risskov Kloakservice with six similar vehicles, which is now managed by one of Orla Holst's sons.

Environmental standards are, of course, complied with by both companies. All vehicles are fitted with

the requisite equipment, and operators hold the ADR certificate required for the carriage of oil and chemicals.

The company operates throughout Denmark – and serves public as well as business and private customers.
