

● **VVS installatøren sørger for det hele**

Det næsten 50 år gamle VVS firma Juhl Nielsen dækker hele spektret indenfor VVS og blikkenslagerarbejde. Kundegruppen er bred og omfatter såvel private som boligforeninger og industrien.

Firmaet er selv ekspert i alt indenfor vand, varme og sanitet, herunder f.eks. tagrender og zinkbeklædninger af tage. Samtidig tilbydes et totalkoncept, hvor VVS firmaet sørger for samtlige de håndværkere, som er nødvendige for at løse en given opgave.

Firmaet foretager bl.a. totale moderniseringer, renoveringer og vedligeholdelse af køkkener og badeværelser for en række boligforeninger. Men også private boligejeres stigende interesse for at få udskiftet de gamle køkkener og badeværelser sætter sit præg på ordrebogen.

VVS firmaet blev grundlagt i 1960 af Arne Juhl Nielsen. I 1990 overtog hans søn, Peter Juhl Nielsen, virksomheden, som i dag har 13 medarbejdere.

● **Plumber that takes care of everything**

Established almost 50 years ago, the plumbing and heating firm VVS firma Juhl Nielsen offers the full spectrum of services within heating, ventilation and sanitation. The firm has a wide variety of customers which include both housing associations and industry and specialises in everything within the above-mentioned fields, including guttering and the zinc-cladding of roofs. At the same time, we offer an all-in concept where the firm finds all the tradesmen required for a specific job.

The firm carries out complete modernisation projects, renovations and maintains kitchens and bathrooms for a number of housing associations. However, the growing enthusiasm of private homeowners for replacing old kitchens and bathrooms with new is making its mark on the order book.

The plumbing firm was established in 1960 by Arne Juhl Nielsen, and in 1990 his son Peter Juhl Nielsen took over the company, which today has thirteen employees.
