

● At ville en høj kvalitet

Vega A/S er en smedevirksomhed med sans for detaljer og kvalitet. Grundlægger og direktør Kurt Basse er selv stadig meget aktiv både i produktionen og administrationen. Vega arbejder fortrinsvis i sort jern, men også rustfrit stål og aluminium bliver anvendt til forskellige opgaver.

Vega er en stærk leverandør til:

- Design-, indretnings- og møbelvirksomheder.
- Andre virksomheder, der ønsker at outsource hele eller dele af deres produktion.
- Entreprenørvirksomheder i Danmark, Europa, Canada og USA.

Gennem 19 år har virksomheden udført talrige opgaver for erhvervslivet og private. Særligt i de senere år, hvor metal er blevet et centralt designelement i vores boliger, har Vega haft lejlighed til at udnytte sine evner og viden inden for: gelændere, elevatorårne, trapper og altaner.

Som en af landets førende underleverandører af stålkonstruktioner indgår Vegas produkter i renoveringer og nyopførelser af bygninger og bygnings-

komplekser. Alle opgaver udføres individuelt og er nøje tilpasset mål og specifikationer.

Østjysk virksomhed med internationalt flair

Vegas placering i det smukke Østjylland har vist sig at være et godt afsæt for internationale aktiviteter. Ud over at eksportere en meget stor del af produktionen har indehaveren Kurt Basse valgt at lægge en del opgaver ud til en virksomhed i Bosnien. Derudover henter virksomheden arbejdskraft i udlandet for at kunne efterkomme de mange ordrer.

Ved både at lægge dele af produktionen ud af landet samt hente kvalificeret arbejdskraft til virksomheden er Vega gearret til fremtiden.

● Focus on quality

Vega A/S is a metal-working business with a feel for quality and detail. The company's founder and managing director, Kurt Basse, still plays a very active role both in production and in the administration of the company. Vega A/S works mostly in black iron, but stainless steel and aluminium are also used for various jobs.

Vega is a strong supplier to:

- Design, interior design and furniture companies.
- Other companies wishing to outsource all or some of their production.
- Contracting businesses in Denmark, Europe, Canada and the USA.

For the past nineteen years, the company has undertaken countless jobs for the business sector as well as for private customers. As metal has become a central design element in our homes,

Vega A/S has in recent years been able to apply its extensive competences and know-how to produce banisters, lift towers, stairs and balconies.

As a leading subsupplier of steel constructions in Denmark, Vega's products are used for the refurbishment and new construction of buildings and building complexes. All jobs are customised to exactly match dimensions and specifications.

Danish company with an international outlook

The beautiful East Jutland has proved a good springboard for Vega's international activities. In addition to exporting much of its production, the owner Kurt Basse has elected to subcontract a number of assignments to a company in Bosnia. Moreover, the company recruits labour abroad to keep pace with the many orders.

Having outsourced parts of production to Bosnia and attracted qualified employees from abroad, Vega is geared to the future.
